# About the book

## Why?

The aim of this book is to inform and motivate more people and more mental health services to adopt and implement family work as a part of basic care.

## How?

In a down-to-earth way the guidebook describes how professionals can involve themselves in working with the families/ carers of their clients for better relationships and superior outcomes.

## What?

Terms such as psychoeducation, family interventions, etc. are not well understood even in the mental health field, despite decades of positive research. Learn from the experiences gained by family services already in place and from detailed examples from various locations around the world.

## Who?

The guidebook is for anyone involved in the care of people with serious mental illness: psychiatrists, psychologists, nurses, social workers, as well as policy makers, service managers, families/ carers and people with mental health problems themselves.
