

# Caring for Carers

*Supporting and Informing Carers*

**Dates: 20<sup>th</sup>, 21<sup>st</sup> and 22<sup>nd</sup> September 2022  
via Microsoft teams**

The Caring for Carers course is a very important element in our Carers' Strategy that was developed in consultation with carers and which seeks to improve the quality of support available to carers.

This 3 day course gives participants the practical skills and resources to enable them to roll out an information and support programme to the carers and family members of people who access mental health services.

The course enables all staff working in either an in-patient or community setting to develop their skills and knowledge in supporting and working with families and it is particularly useful for those who have a specific involvement with carers such as carer leads. Places can also be made available to voluntary sector organisations that provide services to mental health carers. It is particularly helpful if staff can bring a carer along to participate in the course as well.

The course enables professionals and carers to work together in rolling out a comprehensive information and support programme which many carers have found to be extremely helpful. All participants will receive a detailed work manual and other resources to aid delivery of a roll out programme and on-going support can also be made available.

## Themes include:

*Presentation skills • Facilitating groups • Experience of caring • Sharing information  
Local services & resources • Helpful communication skills  
Problem solving skills • Taking care of yourself • Help with implementation*

**The course is free of charge to appropriate staff and carers in Birmingham and Solihull and is available on a fee paying basis to staff and carers from other localities.  
In order to apply or discuss this course in more detail please contact:**

Miss Maria Albanese, Meriden Family Programme,  
Birmingham & Solihull Mental Health NHS Foundation Trust  
Tall Trees, Uffculme Centre, Queensbridge Road
